

A construction of GDDs with block size 4 with unequal group sizes

D. M. Woldemariam* and Natea Hunde, Adama Science and Technology University.

We present a general construction of Group Divisible Designs (GDDs) with two groups of different sizes with blocks of size k wher k is an integer greater or equal to 2. We apply this construction to obtain several families of such GDDs with block size 4.

Keyword: Group divisible design.
