Ramsey and Gallai-Ramsey numbers for graphs related to kipas

Qinghong Zhao*, Bing Wei, University of Mississippi

Given a graph H and an integer $k \geq 1$, the Gallai-Ramsey number $GR_k(H)$ is defined to be the minimum integer n such that every k-edge coloring of K_n contains either a rainbow (all different colored) triangle or a monochromatic copy of H. In this talk, I will present our recent results on Ramsey and Gallai-Ramsey numbers for graphs related to kipas.

Keywords: Ramsey number, Gallai coloring, kipas
